The Kanagi scientific library which practices [folklore-data recollection therapy]

It is the scientific library which lets folklore data pass and is carrying out "folklore-data recollection therapy" of prevention and control of dementia.

Scientific library management which can do recollection therapy which utilized the collection exhibition folklore data for elderly people is performed.

the people whom one were using once -- the labor practice using the chat and the people implement happily while touching the hand with the implement photo of image is seen and the program which offers care support is created to prevention / advance control of dementia.

We recommend you Visit us by the nursing home entrance person or an elderly-people group by all means.

[The mental care therapy program by recollection]

- I Inspect a people implement at the Kanagi folklore-data hall. (1 hour) Use recollection of an old tool
- II Recollection by image data (1 hour) To practice folklore proposal (it has created in 50 years) data Experience of the past by based image viewing and listening is recollected, healing of the "heart" is drawn, and self-healing capacity is urged.
- III Perform exchange of opinions focusing on a discussion (for 30 minutes) annual event, and pull out recollection.

the people of 3,500 points in whom the Kanagi folklore-data hall contains 758 mountain village production tools (country specification) of Haza, and 221 mountain village life tools (Shimane specification) of Haza -- the implement is collected and exhibited.

the people who collected 50 years ago -- quality and quantity of an implement are precious, and especially the paper-milling tools of the Edo period are rare tools which otherwise do not look at a kind.

Full restore also of between sunken hearths is carried out, and it is body present can about old days.

The person of hope needs to tell us a recollection therapy program.

The Hamada Kanagi scientific library (specification administrator) Meeting which protects the Nishi-chugoku-sanchi people implement
